Main Features

X100 – Tripod laser scanner

X100 is a small and compact terrestrial laser scanner, quick and easy to use.

Its multi-line lidar technology and ability to achieve complete coverage of the surrounding area enable it to calculate 3D models for a wide range of applications and scenarios, both outdoors and indoors.

The scanner comes with its own X100app field app, making it easy to control the device. Thanks to the scan converter, the data is compatible with Cube-3d and Stonex Reconstructor, as well as third-party software.

The X100 is the perfect tool for quick topographic surveys, scans of building facades and data collection for floor plans; a quick 360° scan takes as few as 45 seconds.

The built-in panoramic camera allows you to add true colour to your scans.

X100 – Software

X100 app

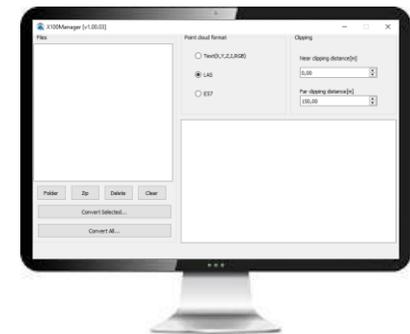

X100 app is dedicated mobile application for X100, to manage projects, real time point cloud display, image preview and other operations.

The APP runs on Android operating system.

X100 Manager

Converter for Windows which outputs *.las and structured *.e57 formats.

X100 – Scan modes

MODE	DURATION
High *	225 s
Normal	225 s
	150 s
	90 s
	45 s

* High mode provides more accurate results

X100 – Component introduction

Camera
FOV 360° | 18MP | HDR

Lidar
Range 120m | 320.000 pts/s

Power button
With LED indicator

USB port
For data storage

Serial port
For power supply

Battery
6h operating time | Display showing %

Tripod
Aluminium | 1.5m height

X100 – Sensor parameters

X100	
Range	0.5 - 120 m
Vertical resolution	16 channels
Point frequency	320.000 pts/s
Field of View	360° x 268°
Measuring mode	2 modes: High and Normal
Collection time	From 45s to 225s
Relative accuracy	Up to 6mm *
Horizontal resolution	2°
Vertical resolution	0.18°
Dual axis tilt compensation	± 5°

* In controlled environment, using High mode

X100 – Physical specifications

X100	
Communication	Wi-fi
Data storage	U-Disk 64GB
Dimension	125 mm x 113 mm x 275 mm
X100 Weight	3,2 g
Total case weight	6,2 kg
Tripod Weight	1,92 kg
Operating temperature	0° C to +40° C (32° F to 104° F)
Waterproof/Dustproof	IP54

X100 TECHNICAL FEATURES

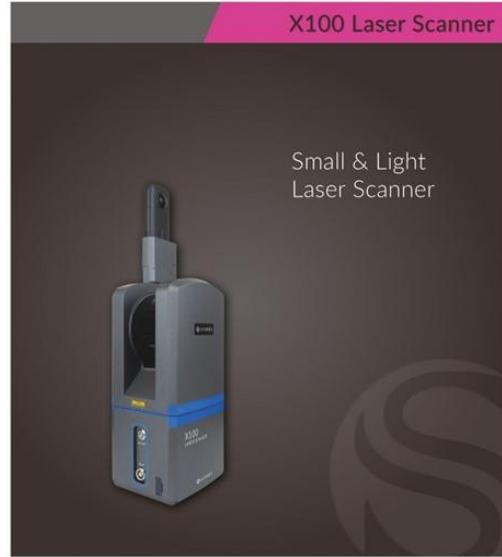

LASER	SYSTEM
Max Range: 120 m	Data Storage: U-Disk 64GB
Min Range: 0.3 m	Operation Mode: Realtime visualization (Android 5.0 or above)
Vertical Resolution: 16 channels	Communications: Wi-Fi
Scanning Point Frequency: 200,000 pts/s	
Scan Principle: Top	ELECTRICAL SPECIFICATION
Field of View: Horizontal 360°	Power Consumption: 20W
Vertical 200°	Operating Time: 6h (2 batteries set - 3h each set)
Laser Class: Class 1	Capacity: 3200x6h set
Weight: 3.2kg	
PERFORMANCE	PHYSICAL SPECIFICATION
Measuring Mode: 2 modes, Selected and Full	Operating Temperature: 0°C to +40°C (+32°F to +104°F)
Collection Time: From 4s to 225s	Storage Temperature: -20°C to +60°C (-4°F to +140°F)
Relative Accuracy: Up to 4mm	Waterproof/Dustproof: IP54
Resolution: 6 mm @ 10 m	X100 Weight: 3.2 kg
Cloud and file compensation: ± 3°	X100 Size: 125 mm x 113 mm x 275 mm
CAMERA	Case Weight: 3 kg
Dimension: 64 mm x 22.5 mm x 140 mm	Case Size: 420 mm x 350 mm x 230 mm
FOV: 360°	Tripod Weight: 1.52 kg
Resolution: 12MP (1080X3048)	Tripod Height: 1.3 m
Management: Integrated in X100app	

1. In unobstructed environment.
2. Tested at 20°C. Changing time and location will vary depending on conditions.

X100 Light & Fast

X100 is a small and compact terrestrial laser scanner that is quick and easy to use.

Its multi-line lidar technology and ability to achieve complete coverage of the surrounding area enable it to calculate 3D models for a wide range of applications and scenarios, both outdoors and indoors.

The scanner comes with its own X100app field app, making it easy to control the device. Thanks to the scan converter, the data is compatible with Cube-3d and Stonex Reconstructor, as well as third-party software.

The X100 is the perfect tool for quick topographic surveys, scans of building facades and data collection for floor plans; a quick 360° scan takes as few as 45 seconds.

The built-in panoramic camera allows you to add true colour to your scans.

SMALL AND LIGHT

The scanner can be easily used by a single person thanks to its small size and weight of approximately 3 kg.

WIRELESS CONTROL

Through the dedicated APP, it is possible to control the device remotely. Scan with one click and check quality via real-time preview.

PANORAMIC HRD CAMERA

Add colour to your scan.

SELF CALIBRATING

± 5 degrees III supplement angle for precise leveling. Monitor scanner leveling via electronic bubble available on the app.

FAST SCAN & DOWNLOAD

A 360° one-stop scan requires only 45 s. Data are saved on USB dongle directly. Post-processing begins after field work!

APPLICATIONS

X100 is the perfect instrument for efficient and precise work in a wide range of applications:

Land & Excavation

Terrain Elevation Models, Volume calculation, Tunnels, Profiles and Contours.

Architecture & Real Estate

Floor plans, Sections, facades scanning.

Emergency Management

Assessment and support of Emergency Response Planning.

3D SOFTWARE

Cube-3d is a Photogrammetric software for mapping and aerial image processing, dedicated to land surveying specialists. It will transform image data into highly accurate digital maps and 3D models with extreme precision. It imports Cube-a surveys and is fully compatible with registered Stonex scans and with any third-party 3D models.

STONEX

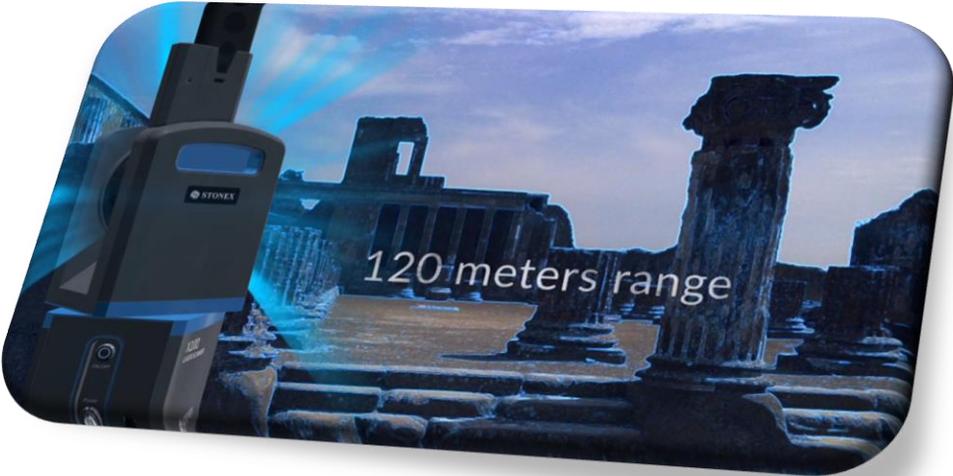

3D RECONSTRUCTOR

The Stonex Reconstructor software allows you to manage and align point clouds acquired through laser scanners or other sensors (such as Stonex handheld scanners), clouds produced by photogrammetry and in general any point cloud. Complete and clear workflows will guide you during the processing and the expandable modules are able to meet different needs, covering many fields, such as: surveying, mining, construction, architecture, cultural heritage, BIM, galleries etc.
